

A METHOD AND SYSTEM FOR ARCHIVING AND RETRIEVING
A MARKUP LANGUAGE DATA STREAM

5 ABSTRACT

A method, system, and program product for the archiving of a markup language document. The method includes the steps of: identifying at least one referenced resource in the document; determining if the at least one identified referenced resource is stored in a storage
10 device; and in response to an unsuccessful determining step, storing the at least one identified referenced resource in the storage device.
